

Flex Kit

PU foam series of Flex Kit

Using our Metallization Fusion Technology (MFT) of **Flex Fabric** to make EMI shielding gasket, for blocked electromagnetic waves to increase the efficacy and safety of electronic products. Shape can be customized.

Features-

- EMI shielding.
- Good conductive ability.
- High performance of flexibility, compressibility and resilience.

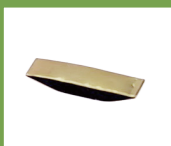

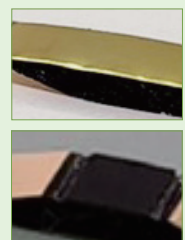

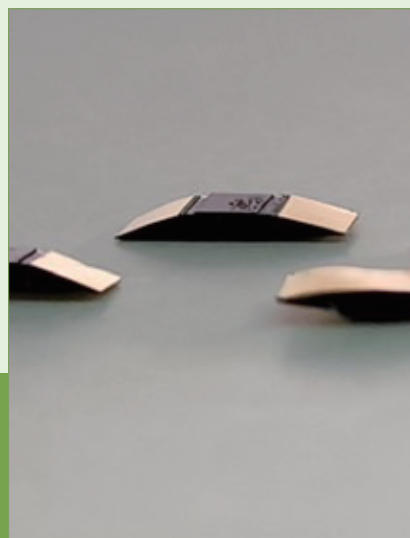

SMT series of Flex Kit

It is effective to reduce malfunction and EMI noise within Electronic Enclosures. Shape can be customized.

Features-

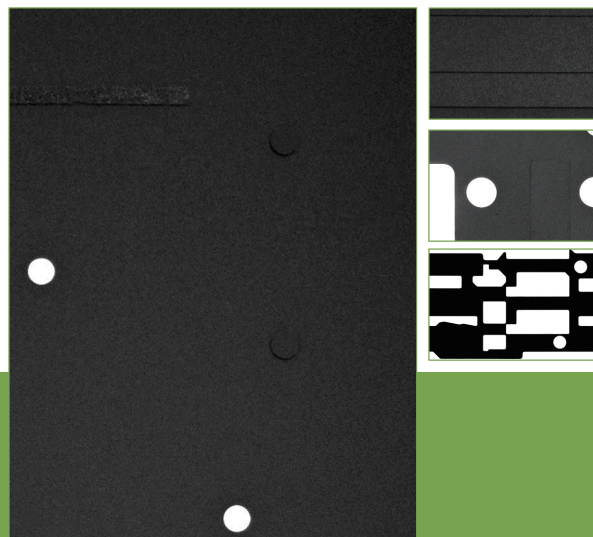

- EMI shielding.
- Flexibility, heat resistance, conductivity.
- Strong out case not easy damaged and deform.

Flex Kit

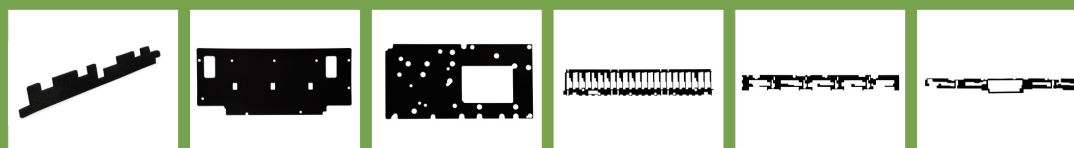

Mylar series of Flex Kit

Mylar film is made from Polycarbonate or Polypropylene, for insulation usage in electronic devices.
Shape can be customized.

Features-

- Stable size.
- Premium insulation, tear strength, heat/cold/moisture/chemical resistant.

Flex Kit

PU 系列 Flex Kit

由採金屬融合技術(MFT)之Flex Fabric製成，具EMI防護功能之墊片，用於阻擋電磁波，以提高電子產品功效及安全性。形狀可客製化。

優點-

- 具EMI防護功能。
- 良好之導電效能。
- 極佳之柔韌性、壓縮性及回彈性。

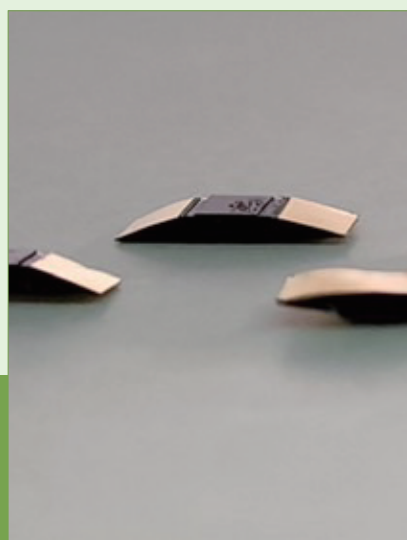

SMT 系列 Flex Kit

有效減少電子外殼內的故障和雜訊。形狀可客製化。

優點-

- EMI防護能力。
- 良好之柔韌性、耐熱性、導電性。

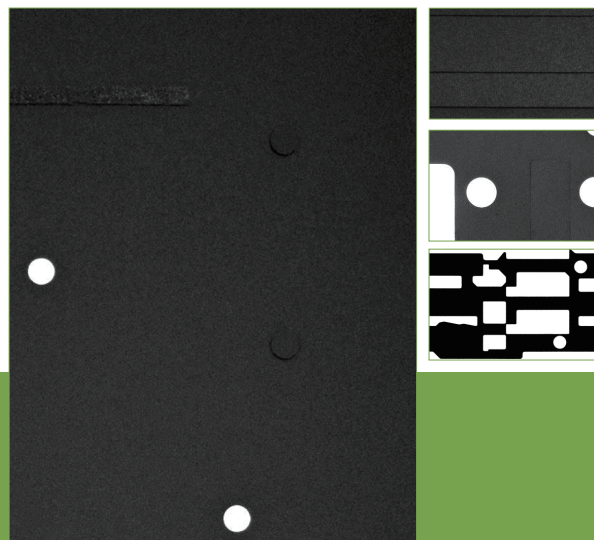

Flex Kit

Mylar 系列 Flex Kit

由Polycarbonate或Polypropylene製成之
Mylar片用於電子設備之絕緣用途。
形狀可客製化。

優點-

- 尺寸精準。
- 良好之絕緣、撕裂強度、耐熱 / 耐冷 / 耐潮 / 耐化學腐蝕性。
